Course Overview

Our Certified Information Systems Security Professional (CISSP) online training course empowers you to study at your convenience, fitting seamlessly into your schedule, allowing you to achieve CISSP certification while efficiently managing your responsibilities at home and work.

Our Certified Information Systems Security Professional (CISSP) online training course is designed to deliver learning that is achievable and tailored to your learning experience with a variety of training methods and solutions that cater to your individual preferences and needs.

Course Learning Outcomes

Why Is CISSP Important?

Awarded by (ISC)², CISSP has been compared to a master's degree in IT security and is globally accepted as the qualification of choice for senior cyber security consultants, managers and directors.

Achieving CISSP will give you the knowledge to enhance your job performance and improve your contribution to your organisation. Many government and regulatory bodies require CISSP certification for certain positions.

Earning the CISSP qualification is an important step in developing a career as a senior information or cyber security manager/director and opens the door to roles with a higher salary and enhanced job prospects.

Audience

Our Certified Information Systems Security Professional (CISSP) online training course suitable for mid- and senior-level IT and security managers who are working towards or have already achieved a position such as:
