Course Overview

Our five-day CompTIA A+ training course will help you to enhance your skills and knowledge on the maintenance of PCs, mobile devices, operating systems and printers.

The CompTIA's A+ certification is the industry standard for validating the foundational skills needed by support technicians in today's digital world.

The CompTIA A+ certification requires that you pass two exams: CompTIA A+ Core 1 Exam 220-1001 and Core 2 Exam 220-1002.

Course Learning Outcomes

The CompTIA A+ certification has recently been updated to reflect the growing focus on topics such cybersecurity, privacy, IoT, scripting, virtualisation and cloud.

After completing our CompTIA A+ training course, you should be able to:

- Support basic IT infrastructure, including endpoint management, advanced device connectivity troubleshooting, and basic networking
- Configure and support PC, mobile and IoT device hardware, including components, connectors and peripherals
- Implement basic data backup and recovery methods and apply data storage and management best practices
- Demonstrate baseline security skills for IT support professionals, including detecting and removing malware, addressing privacy concerns, physical security and device hardening

Page 4

- Configure device operating systems, including Windows, Mac, Linux, Chrome OS, Android and iOS and administer client-based as well as cloud-based (SaaS) software
- Troubleshoot and problem solve core service and support challenges while applying best practices for documentation, change management, and the use of scripting in IT support

Audience

Our CompTIA A+ training course is suitable for entry-level IT Professionals in a technical support role.

Entry-Level Requirements
