PURPLE GRIFFON
The IT Service Management Training & Consultancy Specialists

Course Title: PCI DSS Foundation	**Course Duration**: 1.0 Day
Exam: Included	**Exam Type**: Proctored Exam
Qualification: PCI DSS Foundation Certificate	

Course Syllabus

Our PCI DSS Foundation training course will cover the following topics:

- What the PCI DSS is and how it helps protect payment card data.
- The process of paying by card and the types of transaction.
- The PCI DSS ecosystem with its development cycle and related standards.
- Where the Standard applies and examples of cardholder risk.
- The six control objectives of the PCI DSS.
- The purpose of the 12 PCI DSS requirements.
- Non-applicability and compensating controls.
- The enforcement process and the implications of non-compliance.
- Comparisons of different compliance programmes and merchant level structures.
- SAQ criteria and how to select the correct SAQ.
- Determining the scope and applicability of the PCI DSS.
- PCI DSS documentation and evidence requirements.

Course Overview

Version 4.0 of the PCI DSS was published on 31 March 2022 to meet the evolving cyber security needs of the payments industry, promote security as a continuous process and enable organisations to use different methods to achieve their security objectives.

Our one-day PCI DSS Foundation training course provides a comprehensive introduction to PCI DSS V4.0 and explains the requirements of the standard and how they can be applied to protect payment card data within your organisation.

Course Learning Outcomes

Our PCI DSS Foundation training course will give you an understanding:

- The basics of the PCI DSS and why it important to secure your customers' payment card data;
- The 6 control objectives and 12 technical and business requirements of the Standard;
- PCI DSS merchant level definitions and their requirements;
- The enforcement process and the implications of non-compliance; and
- Demonstrating compliance with SAQs (self-assessment questionnaires) or external audits.

Audience

Our PCI DSS Foundation training course is aimed at anybody accepting credit card payments, including merchants, third-party service providers and acquirers. Our PCI DSS Foundation training course is suitable for a broad audience, including departments such as finance, internal audits, IT and sales and business.

Entry-Level Requirements

There are no formal entry-level requirements for our PCI DSS Foundation training course.

Recommended Reading

You may benefit from advance reading of the following introductory guide: PCI DSS - A Pocket Guide.

What's Next

Our one-day Certified EU General Data Protection Regulation (GDPR) Foundation training course provides a comprehensive introduction to the EU GDPR and a practical understanding of the implications and legal requirements for organisations of any size. Our Certified EU General Data Protection Regulation (GDPR) Foundation training course is a stepping stone for our four-day EU General Data Protection Regulation (GDPR) Practitioner training course.

Additional Information

Every organisation that stores or transmits or processes card holder data must comply with PCI DSS standard. Compliance to the standard is regulated and enforced by payment card brands, such as VISA, MasterCard and American Express, directly or through their partner relationships with ‘acquirer’ banks.
