PURPLE GRIFFON
The IT Service Management Training & Consultancy Specialists

Course Title: APM Project Management Qualification (PMQ)	**Course Duration**: 5.0 Days
Exam: Included	**Exam Type**: Classroom Exam
Qualification: APM Project Management Qualification (PMQ)	

Course Syllabus

Our APM Project Management Qualification (PMQ) training course will cover the following objectives:

Context and Governance

The governance and setting of a project will heavily influence how it is managed. This section will cover topics such as:

- The difference between project and operational work
- Programme and portfolio management
- Project team roles
- The governance of a project across its life cycle

Concept Phase

It is essential that the need for a project is identified and understood before its viability can then be judged. This may involve:

- Identifying and managing stakeholders
- Creating a business case
- Assessing project success and benefits
- Procuring resources and contract management

Definition Phase

The definition phase is often where the project manager is most heavily involved and we look at a structured approach for planning the project - both in terms of what needs to be done and also how it will be done.

- Requirements and scope management
- Schedule and resource management
- Budgeting and cost management

Development Phase

Putting the plan into action will require the project manager to undertake many of the following actions.

- Project control, including cost control through earned value management
- Manage information and reports
- Risk and issue management
- Health and safety
- Quality management
- Change control and configuration management

Managing the Team

No project is successful without an engaged and committed team. This requires the project manager to utilise a number of interpersonal skills.

- Communication
- Conflict management
- Build and lead the team

Project Handover and Closure

Formal closure of a project will help ensure that the deliverables are handed over in a structured manner and that the team and the organisation has reviewed and learned from the performance on the project.

- Project handover
- Project reviews

Course Overview

Our five-day APM Project Management Qualification (PMQ) training course will give you a broad level of project management knowledge sufficient to participate in projects from individual assignments through to large capital projects.

Our APM Project Management Qualification (PMQ) training course will provide you with everything that you need in order to achieve the APM Project Management Qualification (PMQ).
