The Agile Business Case
Stakeholders In The Agile Project
Requirements And User Stories
Prioritisation
Workshops
Modelling
Timeboxing And Iterative Development
Requirements Planning And Estimating Throughout The Lifecycle
The Requirements Lifecycle In An Agile Project
Making The Transaction To Agile BA

Course Overview

Our three-day Agile Business Analysis Foundation training course will help you develop the skills needed to become a proficient Agile Business Analyst.

Our Agile Business Analysis Foundation training course will teach you how to apply the underpinning philosophy, principles and processes of AgileBA in a project situation.

Course Learning Outcomes

Our Agile Business Analysis Foundation training course will cover the following:

- Lay the foundations for successful agile projects.
- Explain how the business analyst role and skills fit in an Agile environment.
- Clarify the different ways of working with the Agile BA during the phases of an Agile project.
- Outlines the lifecycle of an Agile requirement and how to write good, effective Agile requirements.
- Provide a comprehensive set of techniques and practices for effective business analysis and collaborative agile working.

Audience

Our Agile Business Analysis Foundation training course will equip you with basic business analyst skills and is perfect for anyone involved in analysing the requirements for agile projects. Business analysts, developers, Scrum product owners, change managers and PMO managers will all benefit from this course.

Entry-Level Requirements

There are no prerequisites for this course.
