PURPLE GRIFFON
The IT Service Management Training & Consultancy Specialists

Course Title: Agile Business Analysis Foundation & Practitioner	**Course Duration**: 4.0 Days
Exam: Included	**Exam Type**: Proctored Exam
Qualification: Agile Business Analysis (AgileBA®) Foundation & Practitioner	

Course Syllabus

Our Agile Business Analysis Foundation & Practitioner training course will ensure you are able to put agile business analyst techniques into practice successfully. Conducting business analysis in an agile environment differs to traditional business analysis, so this course will equip you with the specific skills required.

Our Agile Business Analysis Foundation & Practitioner training course will cover the following topics:

- Role Of Business Analyst In An Agile World
- Agile Fundamentals And The Agile BA
- The Agile Business Case
- Stakeholders In The Agile Project
- Requirements And User Stories
- Prioritisation
- Workshops
- Modelling
- Timeboxing And Iterative Development
- Requirements Planning And Estimating Throughout The Lifecycle
- The Requirements Lifecycle In An Agile Project
- Making The Transaction To Agile BA

Course Overview

Our four-day Agile Business Analysis Foundation & Practitioner training course will provide you with the knowledge and understanding of the BA role's responsibilities, the techniques used, the practices employed as well as guidance in transitioning to the AgileBA role.

Our Agile Business Analysis Foundation & Practitioner training course will teach you how to test, estimate and evaluate benefits delivery in Agile projects. You will also learn the Agile approach to managing and prioritising requirements.

Course Learning Outcomes

Our Agile Business Analysis Foundation & Practitioner training course is accredited by APMG in partnership with the DSDM Consortium. These courses are based upon the guidance found in the official Agile Business Analysis (AgileBA) Handbook, which draws from the DSDM framework and a variety of other agile methods.

Our Agile Business Analysis Foundation & Practitioner training course will teach to become proficient in the following:

- Lay the foundations for successful agile projects
- Explain how the business analyst role and skills fit in an Agile environment
- Clarify the different ways of working with the Agile BA during the phases of an Agile project
- Outlines the lifecycle of an Agile requirement and how to write good, effective Agile requirements
- Provide a comprehensive set of techniques and practices for effective business analysis and collaborative agile working.

Audience

Our Agile Business Analysis Foundation & Practitioner training course will equip you with the practical skills needed to be an effective agile business analyst. It is perfect for anyone involved in analysing the requirements for agile projects, so is therefore ideal for business analysts, developers, Scrum product owners, change managers and PMO managers.

Entry-Level Requirements

There are nor prerequisites for this course.

Recommended Reading

There is pre-course reading and homework will be set. Both of these will be provided.

What's Included
