- The role and structure of an information security policy.
- The key concepts, principles and main requirements of ISO/IEC 27001:2022.
- The terms and definitions used in the Standard, including risk and options for risk assessments.
- How to interpret the requirements of ISO 27001:2022 to determine the scope of your ISMS.
- How to secure senior management commitment by building a compelling business case.
- How to structure and manage your ISO 27001 project.
- How to allocate roles and responsibilities for your ISO 27001 implementation.
- How to review and map your existing controls to Annex A of ISO 27001.
- The importance of the SoA (Statement of Applicability) and justifications for inclusions and exclusions.
- How to carry out an information security risk assessment – the core competence of information security management.
- The benefits of and key issues when selecting a risk assessment tool.
- How to develop a management framework, write policies and produce other critical documentation.
- The importance of staff, an effective communication strategy and general awareness training.
- The key elements of management review.
- How to prepare for your ISO 27001 certification audit and ensure that you pass first time.
- How to manage and drive continual improvement under ISO 27001.

Course Overview

Our three-day ISO 27001: 2022 Certified ISMS Lead Implementer training course will equip you to lead an ISO 27001 ISMS project, and help your organisation to mitigate Cyber Crime risks while winning new business and delivering information assurance.

Our ISO 27001: 2022 Certified ISMS Lead Implementer training course covers all 9 of the key steps involved in planning, implementing and maintaining an ISO 27001 compliant Information Security Management System (ISMS).

Course Learning Outcomes

ISO/IEC 27001: 2022 is the newest version of ISO 27001 and was published in October 2022. While not significantly different from the previous standard, ISO 27001:2022 has notable changes that include scoping, planning, operation and performance evaluation, and a revised Annex A. ISO 27001 professionals must have the knowledge to prepare and help their organisation achieve compliance with the new standard.

Our ISO 27001: 2022 Certified ISMS Lead Implementer training course will equip you with the skills to support an organisation in effectively planning, implementing, managing, monitoring and maintaining an ISMS. You will learn:

- The nine critical steps involved in planning, implementing and maintaining an ISO 27001:2022-compliant ISMS;
- Information security management best practices to ensure data confidentiality, integrity and availability;
- How to structure and manage your ISO 27001 project; and
- Typical pitfalls and challenges and how to deal with them.
