PURPLE GRIFFON
The IT Service Management Training & Consultancy Specialists

Course Title: SAFe® For Teams	**Course Duration**: 2.0 Days
Exam: Included	**Exam Type**: Proctored Exam
Qualification: SAFe® For Teams Certificate	

Course Syllabus

Our SAFe® For Teams training course will cover the following topics:

- Introducing the Scaled Agile Framework (SAFe®)
- Building an Agile Team
- Planning the Iteration
- Executing the Iteration
- Executing the Program Increment

Course Overview

Our two-day SAFe® For Teams training course will help you to understand the Agile Release Train (ART), how it delivers value, and what they can do to effectively perform their role using Scrum, Kanban, and XP.

You will also learn how to write stories and break down features, plan and execute iterations, and plan Program Increments.

Our SAFe® For Teams training course will teach you about the continuous delivery pipeline and DevOps culture, how to effectively integrate with other teams in the program, and what it takes to continuously improve the train.

Course Learning Outcomes

Our SAFe® For Teams training course will teach you how to:

- Apply SAFe® to scale Lean and Agile development in their enterprise
- Know their team and its role on the Agile Release Train
- Know all other teams on the train, their roles, and the dependencies between the teams
- Plan Iterations
- Execute Iterations and demonstrate value
- Plan Program Increments
- Integrate and work with other teams on the train

Audience

Our SAFe® For Teams training course is suitable for:

- Team members who apply Lean and Agile at scale
- All members of an Agile Release Train preparing for launch

Entry-Level Requirements

All are welcome to attend our SAFe® For Teams training course, regardless of experience. However, the following entry-level requirements are highly recommended for those who intend to take the SAFe® Practitioner (SP) certification exam:

- Familiarity with Agile concepts and principles
- Awareness of Scrum, Kanban, and XP
- Working knowledge of software and hardware development processes
