Course Overview

Our four-day Power Apps Power Automate training course will teach you how to create no-code custom business applications and automate business processes. The course is a four-day instructor-led training programme designed for SharePoint Power Users and Site Owners who want to learn how to create no-code custom business applications and automate business processes using Power Apps and Power Automate.

This course covers app creation, form customisation, data connections, workflow automation, embedding in SharePoint and Teams, and Power BI report creation using a variety of data sources. After the course, attendees can leverage continued support with after-

course one-on-one instructor coaching and a computing sandbox.

Course Learning Outcomes

Our Power Apps Power Automate training course will help you become proficient in the following:

- Customise SharePoint list forms using Power Apps.
- Create Canvas Apps from Scratch.
- Create Approval flows and use the built-in flow features.
- Create custom flows using conditions, triggers, and actions.
- Embed Power Apps and Power Automate in SharePoint and Teams.
- Use Power Apps and Power Automate administrative features.
- Create a Power BI report using SharePoint list data.
- Test your knowledge with the included end-of-course exam.
- Leverage continued support with after-course one-on-one instructor coaching and computing sandbox.

What's Next

Attendees may enjoy our four-day Microsoft SharePoint training course.

Our four-day Microsoft SharePoint training course will teach you how to create, manage, and customise websites using SharePoint Online.

Microsoft SharePoint serves as a comprehensive platform for collaboration, content management, and business process automation, empowering organisations to enhance productivity, streamline operations, and facilitate effective teamwork.

Additional Information

Our Power Apps Power Automate training course offers several benefits to individuals and organisations including but not limited to:

- **Rapid App Development**: Power Apps allows users to create custom business applications quickly and easily, even with little to no coding experience.
- **No-Code/Low-Code Development**: Power Apps and Power Automate provide a low-code or no-code approach to application development and workflow automation.
- **Seamless Integration**: Power Apps and Power Automate integrate with a wide range of Microsoft and third-party services, including Office 365, SharePoint, Dynamics 365, Azure, and many more.
- **Mobile-Ready Applications**: Power Apps generates mobile-ready applications, allowing users to access and use their custom apps on a variety of devices, including smartphones and tablets.
- **Automation of Workflows**: Power Automate enables the automation of repetitive tasks and workflows across different applications and services.
- **Improved Collaboration**: Power Apps and Power Automate promote collaboration within organisations. Multiple users can collaborate on app development projects, providing input, and working together in real-time.
- **Scalability and Extensibility**: Power Apps and Power Automate offer scalability, allowing applications and workflows to grow with the organisation's needs.
- **Cost-Effective Solutions**: Power Apps and Power Automate provide cost-effective solutions for building custom applications and automating workflows.
