Course Overview

Our two-day SAFe® Product Owner / Product Manager training course will teach you how to effectively perform your role in the Agile Release Train (ART) as it delivers value through programme increments.

You will develop the skillsets needed to guide the delivery of value in a Lean enterprise by becoming a SAFe® 6.0 Product Owner / Product Manager.

Course Learning Outcomes

You will explore how to apply Lean thinking to decompose Epics into Features and Stories, refine Features and Stories, manage Programme and Team backlogs, and to plan and execute Iterations and Programme Increments.

You will also discover how the Continuous Delivery Pipeline and DevOps culture contribute to the relentless improvement of the ART.

Audience

Our SAFe® Product Owner/Product Manager training course is designed for individuals who are involved in product management, product ownership, or those who have a responsibility for delivering value through a Lean-Agile mindset. This includes, but is not limited to:

Product Owners: Individuals who are responsible for defining and prioritising the features and capabilities of a product or solution. Product Managers: Individuals who are accountable for the overall success of a product or solution throughout its lifecycle.

Business Owners: Individuals who have a significant stake in the product or solution and collaborate with the product owner to ensure its success.

Business Analysts: Individuals who gather, analyse, and document requirements for a product or solution.

Agile Coaches and Scrum Masters: Individuals who support and facilitate the adoption of Lean-Agile practices within an organization.

Entry-Level Requirements

All are welcome to attend our SAFe® Product Owner / Product Manager training course, regardless of experience. However, the following prerequisites are highly recommended for those who intend to take the certification exam:

- Leading SAFe® Certification.
- Training Experience working in a SAFe® environment.
- Experience with fundamental Agile training at the level of Agile Fundamentals.
