Services, infrastructure and applications

- Analysing the five architecture principles that govern the use of IT-related resources
- Relationship with the other enablers

People, skills and competencies

- Defining skill requirements for each role
- Mapping the skill categories to the process domains
- Skill categories in relation to the process domains

Module 5: Performance Management with COBIT® 2019

Performance Management Principles

- Simple to understand and use
- Consistent with conceptual model
- Providing reliable, repeatable, relevant results
- Flexible to suit different organisations
- Supporting multiple assessment types

Managing performance of processes

- CMMI-based process capability scheme
- The six process capability levels
- Focus area maturity levels
- Managing performance of other components

Module 6: Designing and implementing a tailored governance system

The design process

- Understanding the need for tailoring
- Using design factors and variants
- Stages and steps in the design process

The relationship between design and implementation
The COBIT® 2019 seven phase implementation approach

- What are the drivers?
- Where are we now?
- Where do we want to be?
- What needs to be done?
- How do we get there?
- Did we get there?
- How do we keep the momentum going?

Course Overview

Our two-day COBIT® 2019 Foundation training course provides the knowledge needed to pass the COBIT® 2019 Foundation certification exam, including a comprehensive understanding of the COBIT 2019 framework, the six key governance principles, and the components of a comprehensive governance system. You will learn about COBIT® 2019's forty governance and management objectives, how performance is managed, and how to design and implement a tailored governance system for your enterprise.

COBIT® 2019 is the latest iteration of the industry-leading framework for governance and management of enterprise IT, and provides best practices for the governance and management of enterprise information and technology.
